RAYMOND MAURITZ GERICKE

BACHELOR OF COMPUTING/ SOFTWARE ENGINEERING STUDENT

PERSONAL PROFILE

Enthusiastic about IT and Improving every situation where my skills can be used. Programmed and built my First Arduino program at 16 with the assistance of YouTube. Today I am an aspiring Software Engineering student who has completed numerous national and international projects, tasked with completing a Distilling automation process and plans to develop an Arduino Quadraped (SpotMini). My skills include Linux, C#, C++, SQL, Node.js(Basic), HTML / CSS / GIT and Networking.

WORKING EXPERIENCE

JANUARY 2022

Stock clerk and technician, ROCK COTTAGE PHARMACY (TLC)

I had the responsibility of receiving and signing for stock deliverables and maintaining shelf product quality, along with being tasked with Server and computer management and maintenance along with replacing and copying every data sensitive drive within the company.

SEPTEMBER 2021

Self-employed, Ragnarossons (Unofficial company)

Was tasked with utilizing my own methods to automate the distilling process using Arduino, Raspberry Pi in the following languages: Node.js; Linux; and HTML / CSS.

MAY 2017

Stock clerk and Cashier, NORTHRIDING PHARMACY (TLC)

I had the responsibility of receiving and signing for stock deliverables, as well as maintaining stock on the shelves in an organized manner while also providing new stock with price labels.
